

ATTENUATION MEMBRANE

Thickness	500µm
Roll Width (m)	4
Roll Length (m)	12.5
Tensile Strength (N/mm ²)	>20.3
Elongation (%)	>360
Water Vapour Trans (Sd value m)	498.6
Watertightness (2kPa)	PASS
Nail Tear (N)	324

Capital Attenuation Membrane is manufactured from high quality recycled LDPE, it is flexible, robust and can be joined with tape or by welding.

Top Hats are available for sealing inlet/outlet pipes.

Storage

Rolls should be stored undercover and on a flat level surface, prolonged exposure to sunlight will degrade the product
